

Tapa

Technical description

The line of Tapa pouffes has been designed to complement office spaces, reception areas and breakout zones. Their unique design adds an exceptional character to an interior, creating an attractive and comfortable informal meeting place.

Modularity

The product range comprises eleven types of pouffe – single-level pouffes: "O" type (three heights), "Y" type, "I" type, "Square O" type,

"Square I" type and "Square L" type as well as four-level modular pouffe: "N" type and "Square" type. Used as a single element, the pouffe performs the role of a mobile seat that complements a workplace and improves its comfort. They also allow for creating different arrangements which aid in designing an effective and comfortable meeting zone that facilitates information exchange. The users' comfort is ensured by foam of the proper density and with the right thickness.

Note

The possibility to shade particular pouffe levels or to choose contrasting colours adds an additional aesthetically-pleasing effect to the whole arrangement.
