TELESCOPIC TRIBUNES

Telescopic tribune is a solution that allows flexible management of a venue. A system of retractable rows of different heights can be adjusted to match both the type and size of an event.

The stationary telescopic tribune is attached to the floor and wall, whereas a fully mobile one enables more configurations. Depending on its size, it can be divided into independent modules with its own drive, which facilitates storage when not in use.

Telescopic tribune is fully customizable in order to meet expectations of the customer and to fulfill both the technical and the design requirements of a particular interior. This top-notch product is sturdy, failure-free and ready to demonstrate its high performance.
